AIRBOTIX FAMILY GUIDES

Greater Melbourne Private Secondary School Fees and Upfront Enrolment Costs

79 schools with published 2026 fees

To help families in Grades 7–12 in Greater Melbourne, use the 2026 local student fees disclosed on the school's official website to first make a reviewable annual budget comparison.

Published–fees edition · 24 July 2026

Families budgeting for private school from Year 7 to Year 12 across Greater Melbourne

01

Look at the coverage first, then the price

The Greater Melbourne Government Directory Baseline has a total of 188 secondary, preparatory to secondary open entities in the Catholic or independent school system. After this school-by-school inspection, 79 schools have disclosed the 2026 local students' grades 7–12 fees that can be reviewed; another 2 schools need to check through the fee calculator or restricted entrance, 5 schools still have public information from the old year, and 102 schools have not disclosed the complete 2026 local students' 7–12 grades prices. In the following, only the aforementioned 79 institutions will be compared, without filling in the blanks with old prices or wrong candidates.

Amounts are in Australian dollars (AUD) and verified on 24 July 2026 (AEST). The table is based on the annual fixed expenses for the first child or a standard family, and tries to incorporate fixed items such as tuition fees, resource fees, technology fees, and mandatory camp activity fees clearly listed by the school. The per-family surcharge will not be implicitly applied to individual children, but will be stated separately in the "Cost Range Tips".

This form is suitable for filtering budget ranges, not for school quotations. The school may charge different amounts for different campuses, VHSC General Pathways, Vocational Major Pathways, International Baccalaureate Pathways, elective courses or equipment arrangements; please still ask the school to give written confirmation based on your child's actual entry grade and course path before payment.

02

Compared with this, it is less likely to be distorted.

First look at the annual amount for the same grade, and then look at non-refundable upfront payments and refundable or tuition-creditable payments. The first transfer may also include an application fee, a confirmation fee and a deposit; only the portion of it that can be refunded or later used to offset tuition fees should not be considered a permanent cost.

If the school charges a per-family surcharge, the apportionment results will be different for families with one child and for families with multiple children, so this guide does not make assumptions for you. You can put the annual fees, family surcharges, equipment, school uniforms, transport and elective fees in the table into your own budget table, and then confirm according to the actual situation of your child.

"—" means that the school's 2026 information does not publicly list the item, which does not mean it is free. If the school provides multiple course paths, this guide will explain in the prompts which comparable path to use; families should confirm with the school the actual amount applicable to their children.

- **Oxley Christian College · Fee scope note:** The school's annual tuition.

Before contacting the school, it is recommended to confirm together.

Each family focuses on different campuses, courses and payment pace. You don't need to think through all the questions at once when you contact us for the first time; you can bring the list below first and ask the school to respond in writing one by one based on your child's actual situation.

- ☐ Whether the child's entry grade, school district and course path are consistent with this table
- ☐ What are the mandatory surcharges, camp activity fees, equipment fees or course elective fees in addition to the annual tuition fee?
- ☐ Whether the surcharge per family is only charged once, and how to handle it when multiple children are in school at the same time
- ☐ Among the application fee, acceptance fee, confirmation fee and deposit, which ones are non-refundable and which ones will be used to offset tuition fees
- ☐ Conditions for early payment discounts, sibling discounts, and whether they only apply to tuition fees
- ☐ Notice period for withdrawal, refund conditions and late fees

If the written amount given by the school is different from this guide, please refer to the school's latest written document. You can also put the date and link to the new document next to your budget sheet, so it's less likely to mix in old year information the next time you compare.

Source, update time and usage boundaries

School ranges are derived from the Victorian Government's School Locations 2025 data: metropolitan local government area, Catholic or independent school system, secondary or preparatory to secondary, open status. Every customer-visible number goes back to the school's own webpage or the school-hosted 2026 local student file; third-party comparison sites, search summaries, international student tables, other campus tables, music class schedules and school camps, sports and excursion fund tables are not used as sources of numbers.

The source status of all 188 schools in the internal directory has been written: 79 are "2026 local student data can be read", 2 are "login or calculator restricted", 5 are "only old year data", 102 are "undisclosed full price", and there are no records to be studied. To avoid making old prices look like current prices, the latter three categories do not enter into numerical comparisons in this guide.

This guide is a compilation of information, not a school quote, financial advice, or a commitment to enroll. Fees, discounts, courses, and refund terms may be updated; please obtain the latest written confirmation from the school that applies to your family before applying, signing, or making payment.

About Airbotix Family Guides

When parents make education choices, the real difficulty is often not that they cannot find information, but that different schools have different calibers, years, and fee compositions. Airbotix Family Guides organizes the official information into check-by-check family tools, hoping to help you mix old lists less often and make it easier to ask budget-changing questions.

Airbotix provides project-based AI, coding and robotics learning for Australian families. After your child enters middle school, if you are also thinking about how to turn your interests into work that can be displayed, you can first go to the official website to learn about the curriculum and Family Guides; if you haven't decided on a direction yet, that's okay.

NEXT STEP

What to do next

These figures come from school-published 2026 domestic fee information. Confirm the final amount, available places and applicable terms with the school before applying or paying.
